## OPERATING INSTRUCTIONS

- To change the colour of the light, simply turn your light **OFF** for **2 seconds** and then turn it back **ON**. This will signal the light to step through to the next colour. Colours will display in the order above, to select a desired colour, simply step through the colours until you find your desired selection.
- Your lights will automatically save your selected colour once the power has been turned **OFF** for more than 1 minute so the next time the lights are used, they will illuminate on the last colour selected.
- To reset or 'synchronise' your lights; with the power turned **ON**, turn the power **OFF/ON** once rapidly. This will put the lights into **RESET** mode (flashing **BLUE**), once this occurs turn the power **OFF**, wait 2 seconds & turn the power **ON**. Your lights should now be synchronised.

## SYNCHRONISED INSTALLATION

When installing multiple lights; to ensure synchronisation and ease of operation all Lights must operate from a single switch.
