

EVOFG

LED POOL LIGHTS

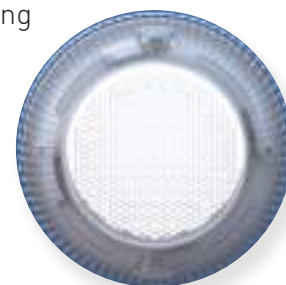

AQUA QUIP
www.aquaquip.com.au

Low profile, compact niche light – suitable for fibreglass and above ground vinyl pools

- EvoFG is simple to install, as it fits through a 60mm hole in the pool wall panel. Panel thickness can be up to 40mm thick.
- 1.2m of cable is factory wound up inside the niche and features a Quick Connect Plug Kit, enabling detachment of pool light lamp when needed. This cable length provides the installer greater flexibility in the pool light positioning and allows EvoFG to be installed below ledges – eliminating shadows and providing enhanced illumination.

- Available in fixed colours of blue, white and warm white – as well as multi-colour.
- Multi-colour lights can be operated from Aqua-Quip's InstaTouch Smart Lighting Controller, a wall switch or a variety of third party control systems.

Compatible with
InstaTouch™
SMART LIGHTING CONTROLLER
