

MAXI-FLOC PLUS

HEAVY DUTY, FAST ACTING LIQUID FLOCCULANT

A specialised blend of our liquid floc combined with a concentrated polymer resin Maxi Floc Plus will settle debris and organic matter to the floor of the pool in 3 – 6 hours.

Benefits

- Clears the cloudiest pools in under 6 hours
- Use to remove dead algae and other floating particles
- No messy residue

Important Notes

- Will not work if algae are present.
- Superchlorinate before using Lo-Chlor Maxi-Floc Plus
- Prior to adding Lo-Chlor Maxi-Floc Plus, adjust pH between 7.5 and 7.8
- If your TDS reading is above 1500ppm, this product will not work effectively
- Unless sufficient Lo-Chlor Maxi-Floc Plus is used, floccing activity will be minimal
- Set the filter to BY-PASS or RECIRCULATE, otherwise remove filter grids prior to application
- After debris has dropped to the bottom of the pool, vacuum to waste where possible, clean the filter and adjust your chemicals if necessary

Dosage

- 1L per 50,000 Litres of pool water

What is the difference between a clarifier and a flocculent?

A clarifier is designed to be used with a filter system, so particles coagulate in the filter. A flocculent is NOT to be used with the filtration system as the filter may clog. Flocculants are formulated to drop particles to the bottom of the pool, so they can be vacuumed away.
