

Super Pump[®] VS

VARIABLE-SPEED PUMP SERIES

Energy Savings You Control

Hayward's best selling Super Pump is now even better! The new variable-speed Super Pump VS takes efficiency to the next level with up to 80% energy cost savings over traditional single-speed pumps.

The Super Pump VS is a self-priming pump that incorporates an improved seal and impeller design that will provide many years of efficient, dependable, corrosion-free service. The advanced design provides superior performance while reducing maintenance requirements. Upgrade to Super Pump VS and save energy... and money!

SAVE ENERGY & MONEY

With the latest addition to our Pump Range

Features and benefits:

- **Super Sized Housing**

Allows for super silent operation

- **Save Electricity & Money**

A reduction in pump speed of 50% will reduce energy consumption by up to 75%

- **Better Filtration**

The filter can often remove smaller particles when the water moves more slowly

- **Improved Long Wearing Seal**

Improved drip-proof and heat resistant long wearing seals allows for peace of mind

- **Self Priming**

Up to 2.4M above water level

- **Includes Unions**

Includes both 40mm and 50mm union tails

- **Swing Aside Knobs**

For easy lid removal and basket access

- **Lexan See Through Cover**

For easy basket viewing

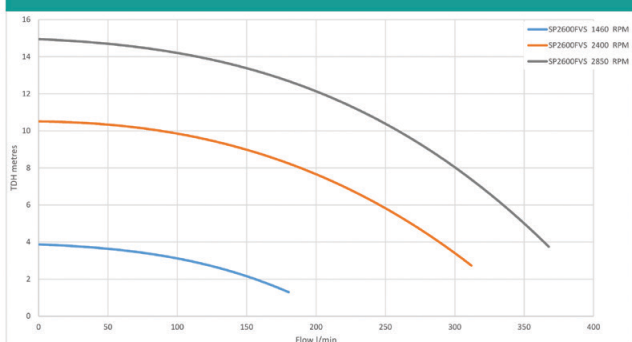

- **It's a Hayward!**

Over 3 million Super Pumps installed globally

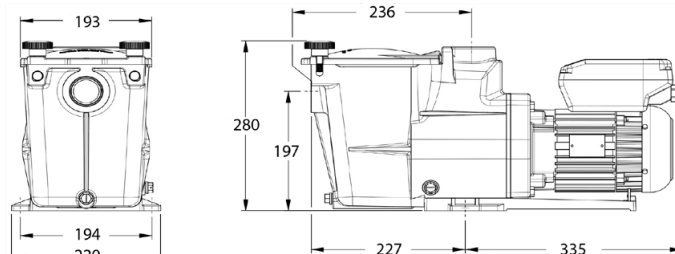

The choice is clear!

Hayward® pioneered the single speed thermoplastic pool pump in 1975. This unit has a reputation for quality, durability and longevity. We now have the technology to upgrade this dependable pump to suit today's needs- by manufacturing a variable speed model. The Super VS Pump is an easy choice for a customer who prefers easy maintenance and dependability while saving money on energy costs.
