

HOW IT WORKS

The **POOLSKIM** is attached to the inlet pipe or return to pool fitting - this is where the water returns to your pool from the filter. The jet of water going through the body of the **POOLSKIM** creates a venturi that draws surface water and debris in through the floating hat. This debris is collected in the easy to clean clip on bag.

SELF ADJUSTING

The **POOLSKIM** has a floating hat that self-adjusts to the water level so it always skims effectively even if heavy rain or evaporation alters the water level.

FLEXIBILITY

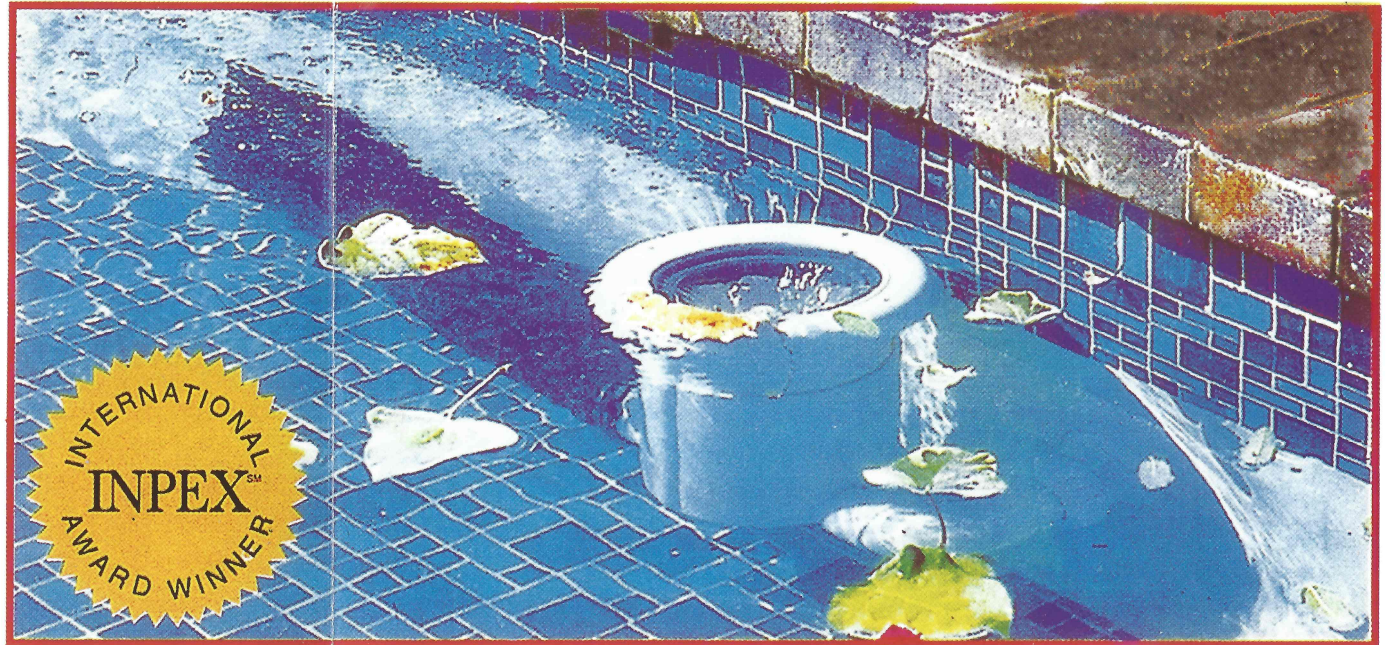

Designed to suit virtually any pool. There are a number of ways the **POOLSKIM** can be connected depending on the shape of your pool and the position and type of the inlet pipe. **POOLSKIM** will fit above ground pools, fibreglass and concrete pools. **See your Pool Shop or Service Technician for more information.**

FULLY ADJUSTABLE

The **POOLSKIM** is fully adjustable to create a water flow around the pool that brings debris to the **POOLSKIM** and maximises skimming effect.

CO-OPERATION

Because **POOLSKIM** works on the return where the water is pumped back into the pool it does not effect the operation of other Automatic Pool Cleaners. It will enhance their operation by ensuring leaves and other floating debris do not sink to the floor of the pool and makes sure the required skimming action on the surface of the pool is maintained.

CLEANING MADE EASY

Instead of a messy basket to empty the **POOLSKIM** is provided with an easy to use clip-on bag which collects all the debris cleaned from the surface of the pool. It is a simple matter to clip-off the bag, empty and clip it back on. **Simple, clean and easy.**

THE POOLSKIM IS YOUR ANSWER TO A HASSLE-FREE POOL

EASY INSTALLATION
No drilling or gluing required

FLOATING HAT
Self adjusts to the water levels of your pool

REDUCES THE PUMP'S WORKLOAD
Increases it's life span

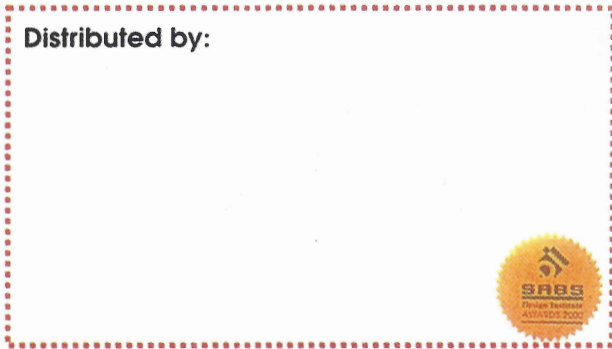

EASY TO CLEAN
Clip on bag for easy removal

CO-OPERATION
Works in conjunction with your Automatic Pool cleaner

FLEXIBILITY
Designed to suit any pool
